

At Start Easy we work with young people because we want to support them in **leading fulfilling lives**, help them prepare for their future, and for them to believe that **they can make a difference** in the world. The best way to make this difference is by encouraging young people to **embrace long-term behaviour change**. Many current social and environmental problems are caused by unhealthy or unsustainable human behaviour.

Most people need to adapt their behaviour, and not just for the duration of a project, but for life. **Young people know more about these issues than ever before**, but many still behave in a detrimental way. It is clear that simply raising awareness is not enough to change behaviour; it requires different values, attitudes and skills.

## SCIENCE IS FOR ALL NOT FOR SOME

Brent goes Wild is a partnership enabling Children and Young People aged 6-14, from background currently under-represented in science and natural heritage, to discover for themselves their innate capabilities for curiosity and experimentation. The programme aims to provide young people with the chance to explore aspects of STEM in less formal settings with the intent to ignite new interest and/or raise attainment in STEM subjects.

The curricula for 6-10 years old age groups will lead to a badge and a certificate issued by **the Food and Agricultural Organisation of the UNITED NATION.**

Each activity has a specific learning objective and children will also be expected to learn more general skills including: Teamwork imagination and creativity, Observation skills, Cultural and environmental awareness, Numerical and literacy skills

## OUR PROGRAMME

The 12 sessions programme will explore:

- **CLIMATE IS LIFE:** introduces our climate system and why it is important to life on Earth.
- **Biodiversity:** Our Air, Our water, Our Land, Our world.
- **CAUSES OF CLIMATE CHANGE:** Explores the natural and human factors that are causing climate change.
- **IMPACTS OF CLIMATE CHANGE:** Discuss how climate change affects ecosystems and human health and safety.
- **SOLUTIONS TO CLIMATE CHANGE:** looks at how the local and international community responds to the threat of climate change.
- **TAKE ACTION** suggests ideas for how individuals can live climate-friendlier lives and how you or the group can join in and help out.

## TIMING AND SETTING

- Sessions will usually last between 1h30 min - 2h
- Groups of a maximum of 15 children
- A mix of outdoor and indoor activities
- Children will receive a welcoming pack and the wallpaper to complete their journey
- They will also receive a novel book: Yummiland, which will explore the direct connection between science, nutrition, the environment, and challenging stereotypes.
